G.O. No. 1677 P.H

DATED 5/7/29

[Despatch Abstract.]

Grant -

Udipi, South Kanara District - maintenance of Mr. Madhava Pai's Kanara Medical and Surgical Institute - not sanctioned

---

To

The Honourable The Minister in charge of Public Health,
MADRAS.

Through:

The Surgeon General, Madras.

HUMBLE MEMORIAL OF **Dr. T. Madhava Pai**, M. B., & B. S., PRACTISING IN UDIPI TOWN, SOUTH KANARA DISTRICT.

Most respectfully sheweth as follows:—

1. That your momorialist is a Registered Medical Practitioner carrying on his profession in and around the town of Udipi since May 1925.

2. That your memorialist is the Proprietor and the Doctor in charge of "the Kanara Medical and Surgical Institute" of Udipi, S. Kanara, which was opened in May 1925.

3. That the said Institute comprises a Dispensing Department for outpatients, Separate wards for male and female patients, a special ward for the well-to-do and a Maternity ward. Besides there is an Operation Theatre, an Eye Department and a Dental Department. The said departments are equipped with all the necessary medicines and Surgical Instruments, and the Institute thereby provides ample attention to out-patients, facilities for every kind of operation and accommodation and good treatment to all cases of In-patients.

4. That in the Maternity Ward which is a special feature of the Institute, Maternity cases and ailments peculiar to women are treated. Educated women trained by your memorialist in his Institute as nurses are in attendance on the male and female In-patients throughout the day and night.

5. That in the said Institute all kinds of work in the Maternity, Eye, Dental, Injection and Operation Departments is undertaken, and complicated cases are also kept under observation. In short, the Institute is a thoroughly equipped well-manned Private Hospital run on the most up-to-date lines.

6. That during the comparitively short period of its life, the Institute has grown highly useful and necessary and that it has fast gained popularity is evidenced by the increasing numbers of the ailing and needy not only from the Udipi Taluk, but also from other parts of the District resorting to it for treatment and assistance. Within 18 months of its inception, there were 7021 prescriptions issued, 94 attended the injection Department, 98 the Eye Department, 41 the Dental, 37 patients were treated in the general and Special wards, 15 in the maternity ward, and 18 operations were performed. In the year 1928 there were 141 In-patients treated in the various wards and 12,300 prescriptions issued. The average daily attendance for the year 1928 was 34 in the Out-patients and 11 beds were occupied per day in the wards.

7. That the good work turned out in the Institute and its necessity and increasing usefulness to the suffering Public is highly appreciated by all who

have come in contact with it in some way or other as is clear from the opinions recorded by many gentlemen in high position who have had opportunities of observing the working of the Institute, in the remarks book of the Institute. A printed copy of a few of the opinions is enclosed herewith.

8. That your memorialist has invested Rs 12,000/-, in the equipment of the Surgical and other departments and of the Maternity, general and Special wards. As per figures stated in the appendix hereof the Annual and recurring cost of the Institute so far as the In-patients Establishment is concerned is Rs. 5,172/-. This amount does not include the cost of medicines, injections, food etc., because such charges are in most cases recovered from the patients themselves. The average cost of treating one In-patient comes to Rs. 36—8—0. The Institute charges a nominal sum of Re. 1/- per day for a single bed in the special ward, annas 8 per day in the other wards. The greater majority of the patients who flock to the Institute, however, are too poor even to bear the cost of medicines and injections administered to them, and the Institute in accordance with its humane policy of Public Service finds it hard to extract payment from them commensurate with the benifits, attention and care it bestows on them. That out of a sum of Rs. 2290/- due on account of the bed charges, the Institute collected a sum of Rs. 762—8—0 in the year 1928, out of which Rs. 211/- came from patients in the special ward.

9. That attracted by good accommodation and successful treatment provided for by the Institute the number of the ailing in need of service has been daily increasing. The Institute has not so far shut its doors to them. But your memorialist finds it more and more difficult to carry on the useful work undertaken by him in the Institute, without a Substantial measure of contribution or subsidy from the Local Government which has been luckily realising its share of responsibility in matters of Public Health more and more in recent years. Any contribution made will not only enable your memorialist to succesfully run the Institute, but also will help him to enlarge its activities to suit the needs of the suffering Public, specially the poor classes.

10. Your memorialist therefore humbly prays that the Government may be graciously pleased to recognise the utility of the "Kanara Medical and Surgical Institute" started and maintained by your memorialist in the town of Udipi and in token of such recognition, the Government may be pleased to make a substantial contribution every year towards the up-keep and maintenance of the said Institute with effect from the commencement of 1929.

Kanara Medical & Surgical Institute

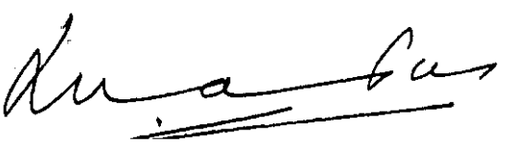
Kanara Medical & Surgical Institute
Udipi 5-5-1929.



What eminent men have to say about the Institution.

The Institute combines in itself the elements of hospital and home conditions. I believe this is the first of its kind in the Madras Presidency. Patients are given in addition to the guarantee of cure, all conveniences at a comparatively cheap rate. The Doctor deserves the congratulations of the public, not to speak of the gratitude of the patients.

Sami Venkatachalam Chetty, M. L. C.,
Ex-President, Madras Corporation, Madras.

Dr. T. Madhava Pai has done a real service to Udipi, nay, to South Kanara itself by opening a nursing home in this Holy place with up-to-date conveniences and efficient modes of treatment. The Home is provided with different departments not forgetting the inestimable blessing of Maternity. The instruments are new and copious. The home is resorted to by the rich and poor.....Udipi should be proud of the Doctor and I sincerely wish the young and promising Doctor a prosperous career in his God-given noble mission in fulfilling which, he deserves every encouragement at the hands of the public. The Doctor has in view the starting of a Tuberculosis Sanitorium at Parkal, 3 miles from here and the place is an ideal one being on a high elevation with an open space all round, dry atmosphere etc., just the place fit foran institution of the kind proposed.

Hosakoppa Krishna Rao, M. L. C.,
Mysore.

The facilities for accommodation and treatment are very good much better than any Taluk Board Hospitals in the Presidency. The tendency among us is mutual recrimination and it will be my greatest regret if the public do not take advantage of his nobe and missionary work by heartily co-operating with him.

Dr. K. Venkatesha Pai, L. M. & S.,
Haller's Pharmacy, Madras.

The wards are full and the patients look quite cheerful and happy. The institute is well equipped and self-contained. The management leaves nothing to be desired and I do not think any Taluk Board Hospital can boast of such equipment and management in spite of its resources.

Dr. P. Janardhan Rau, L. M. & S.,
Asst. Surgeon, L. F. Hospital, Karkal.

The arrangements are excellent, the equipments up-to-date and the patients cheerful and well cared for. May God vouch safe unto him the brilliant success he so richly deserves

V. K. Narayan Nair, Vakil. *Ottapalam.*

The Kanara Medical and Surgical Institute is an instance i. e., of what private enterprise can do even amidst difficult circumstances.

A. Ranganatham, *Minister,*
Madras.

I am glad to find that it has grown into a useful Nursing Home with enough accommodation for In-patients, thus serving the needs of middle class people, who cannot always expect enough facilities in many of the Local Fund Hospitals I am glad to find the Institute is well equipped and within the short time the Institute was started Dr. Madhava Pai has managed to turn out good work.

Dr. K. Krishna Rau, M. B. & C. M.,
Asst. Surgeon, Udipi.

The excellent condition in which the Institute is run and the sincere interest which he evinces in treating his patients are attracting patients every day. I have been seeing the wards invariably full Above all what impressed me was the spirit in which he was rendering medical service. It was mere for the sake of service than for anything else. God willing it will turn out to be in course of time, one of the best of its kind in the Presidency.

P. G. Nambiar, B. A.,
Excise Department.

DISTRICT MUNSIFF OF UDIPI.
on 21—11—'26.

REPORT

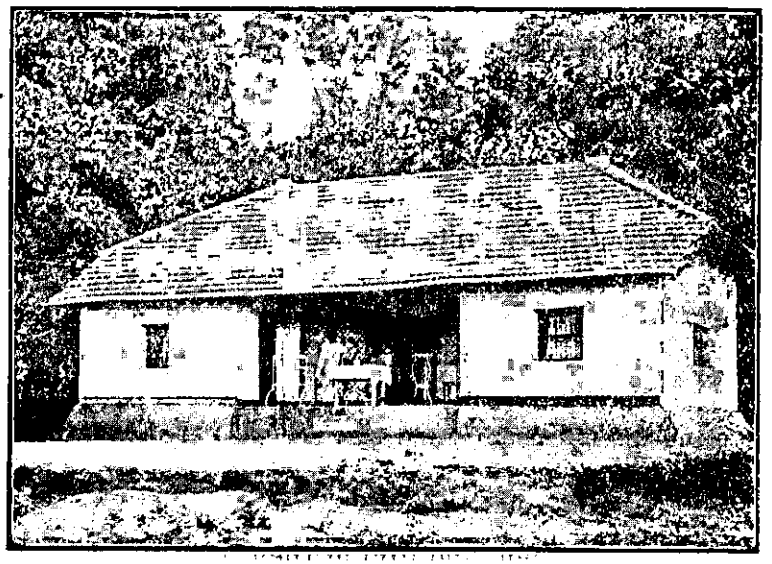
Mr. President and my friends,

I thank you sincerely for responding to my invitation for celebrating the opening ceremony of the Main Block of the In-patients' Wards. The language of joy or emotion is always brief and I pray you from the bottom of my heart to make up any deficiency that my words may appear to reveal, so that like the Institution which has grown from a humble beginning to a well-equipped Hospital, my words may in your generous minds grow to the full expression of my feelings. You have all been of the greatest help to me in building up this Institution and I have been anxiously thinking of how to repay your kindness, co-operation and sympathy in a befitting manner. I only hope that with your blessings Providence may grant me strength to build up this Institution for which I am working with devotion and serve a useful career in relieving pain, in comforting distress, and restoring health.

18 months ago, I started the Kanara Medical and Surgical Institute in a small room in the compound of Sri Ramakrishna Buildings. Little did I dream that the humble beginning I then made, is by your co-operation and sympathy a full fledged Hospital to-day giving accommodation to in-patients both in male and female wards. It is rather difficult for a private individual to have a private Hospital and as such a private Medical man has very limited scope for Hospital work and few opportunities for undertaking operation work also for want of proper equipment. And for all this, the private Medical man is not to be blamed and what is more difficult is to get over the prejudice that the public have of him for not fully equipping himself with all requirements. It is with the idea to remove the prejudice that the public have of him and show them that a private Medical man can do as much if not more as an officer in charge of the Hospital, provided he can accommodate the patients and has got nursing arrangements and other necessary equipment, that I was working for the development of this Institution. To many the idea seemed merely chimerical and not worth the experiment, especially in a small place like this. But to me it was nothing short of my 'Ista Devata' for the working of which I

10

MATERNITY WARD.



PROVIDES FACILITIES FOR TRAINING NURSES & MIDWIVES.

Trained Nurses in attendance day and night.

spared neither money, time nor leisure, in spite of monetary and other initial difficulties. And my ambition is to make the Institution most up-to-date and want in nothing, so that cases which can be dealt with here are treated here and not advised to resort to Madras and other places.

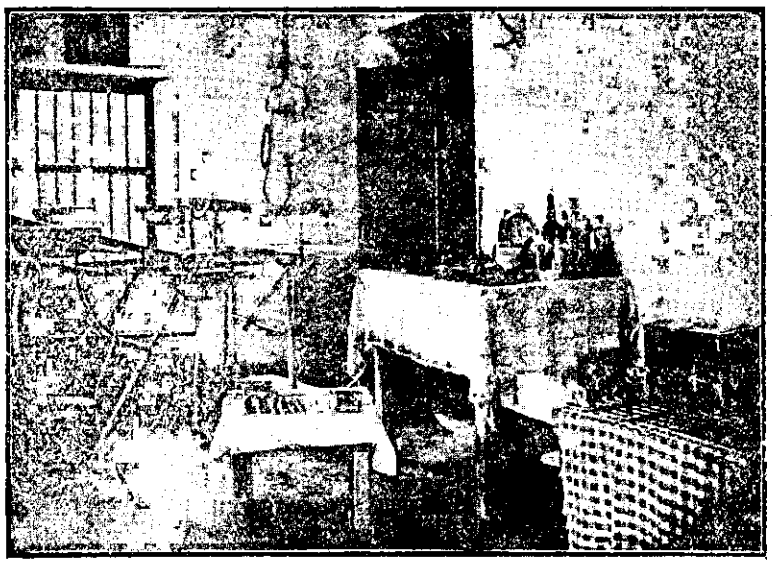
And as I told you previously that I was waiting anxiously to thank you for your kindness in a fitting manner, I pitched upon to-day to invite you here for a social gathering and lay before you the work done for the last 18 months.

The Institutute, as you know, was started in a small room in the compound of Sri Ramakrishna Buildings and it was soon found necessary to convert it into a consulting room, and have separate accommodation for the Dispensary. This was done and the patients that were coming from mofussil places were to be accommodated and for a time they were temporarily lodged in the consulting room. At one time the rush was so great that I found it impossible to carry on consultation work on account of the over crowding of the in-patients. It was therefore necessary to have separate block for in-patients and they were lodged in the Block No. 2. Side by side as I was taking maternity work, I found it dificult to find trained nurses and to add to the difficulty I could not find educated women to take up this work. With great difficulty I had to train 2 nurses by holding classes for them and giving them monthly stipends and to-day my work is easier on that account. With the training of the nurses people came to me for Maternity work and I found it necessary that there must be a separate block for such cases and other ailments peculiar to women. Nearly four months are over since that block was constructed and occupied. For each block, I wished to have the opening ceremony and invite you all, but the time was so short and the demand from patients was so pressing, that after 18 months I could invite you only to-day. You will be anxious to know the progress of the Institution from the date of its inception. There were 7021 out-patients' prescriptions, 94 attended the Injection Department, 98 in the Eye Department, 41 in the Dental, 37 in the in-patients, 15 in the Maternity and 18 Operations have been performed.

The following are some of the Main Departments.

1. Eye Department.

In this section, Eyes are examined and any defect in eye-sight is found out & remedied. This department is well equipped with a first class Eye Test Case, Dark room, Ophthalmoscope etc., and glasses are tested and fitted to the requirements of the patients. Operation is also undertaken whenever necessary.



OPERATION ROOM.

2. Dental Department.

In this section, all kind of Dental work is undertaken such as painless extraction, stuffing, cleaning etc. No pains are spared to make known to the patients the importance of having good and clean teeth.

3. Injection Department.— This department undertakes to do all sorts of injection work under careful supervision and in strict accordance with hygienic rules.

4. Observation Department.— In some cases where the disease could not be detected, the patient is kept under observation till disease is detected and remedy found out.

As you see, all work in the Eye, Dental, Injection and Operation department is undertaken.

Kindly excuse me if I have taken pretty long time in making known to you the progress of the Institution and I request you one and all to render your hearty co-operation in making the Institution serve a useful career not only in this town but in the District. Every attempt will be made to deserve your sympathy and support.

There are as you know great many defects in the beginning of every Institution and I entirely depend upon your goodness for the removal of any of them in this Institution.

Believe me my friends, there is no limit to a youngman's ambition and the disappointments too are many. But your sympathy will go a long way to fulfil the aspirations in spite of the obstacles. There is no other dreadful disease in India to-day than Consumption and our District is no exception to it. Doctors have exhausted all the resources in fighting the fell disease which tolls a large number of our people. The only remedy that Doctors have found is pure air, good food, and sunlight. Though God has given these in plenty, very few of us can boast of enjoying them in our homes. A sanitorium in an excellent Hill site like Parkal, I believe will answer this great want in a large measure and will go a long way in the education of the people as to the proper care of these cases and cure of the early ones.

I know I am soaring high and I know my limitations too. But the Almighty who has given you large and generous hearts will also inspire you to lend your sympathy and co-operation in this noble task and also spare me life and strength to accomplish the idea in a short time. I hope and trust that you will not be wanting in enthusiasm in offering me help, when I launch on this heavy undertaking. My friends, for all my labour and pain I seek no reward except your satisfaction and good will.

T. MADHAVA PAI.

SECRETARY TO GOVERNMENT

LEGISLATIVE COUNCIL MADRAS

Dear Mr Muthia Mudaliyar, 19473

Madras 20/5

I ~~have~~ forward herewith a copy of a memorial from Dr T.Madhava Pai, M.B.,& - B.S.,a copy of which had already been forwarded to the Director of Public Health through the Surgeon-General,Madras. I have visited the institution " the Kanara Medical and Surgical Institute" under the guidance of Dr Pai and find it serves a real public need for all classes of people and amply deserves Govt grant-in-aid.

Yours Sincerely,

J.A.Saldanha

To

The hon.Mr S.Muthia Mudaliyar,
Minister for Public Health,
Madras.

P.3 Cf. Cno. 22827 from the S.G. No. 2928 17.6.29

BJ. The S.G. states that there is a Government hospital at Udipi

1 2

to treat all the poor patients of the town and that it does not seem necessary to subsidise Mr. Madhava Pai's Kanara Med. & Surgical Institute. The question whether maintenance grants can be sanctioned to a larger number of private med. institutions than at present is separately under consideration. It is proposed to call for information from the S.G. in regard to the cost of maintenance of private med. institutions in the Presidency. It is for consideration whether the present application for grant may lie over pending the issue of orders on the general question referred to above or whether in view of the remarks of the S.G. in the present case the petitioner may be informed that the Govt. are not prepared to sanction any maintenance grant to the Institute. In any case it seems unnecessary to await the receipt of the copy of the petition submitted through the D.P.H.

2. For orders.
